For immediate release

New infrastructure for Yanmar Vineyard Solutions

Epernay, France, September 3, 2024 - Yanmar Vineyard Solutions, Yanmar's viticulture technology subsidiary, is proud to announce the construction of a new building in Champagne, France.

Announcement of a new building
Yanmar Vineyard Solutions (YVSS) is pleased to announce the construction of a new building in Epernay, designed to bring together all the company's departments under one roof. This initiative marks a significant milestone in our growth and development strategy, aimed at improving the efficiency and synergy between our teams and, above all, marks YVSS' long-term presence on the French market.

A hub of synergy and innovation
The new facility, located in the heart of the Champagne region, will provide a modern and innovative environment for YVSS employees. Equipped with the latest technologies and meeting the highest sustainability standards, it reflects our commitment to sustainable and responsible development.

A step forward for our employees
This new building will offer our employees optimal working conditions, with spaces suited to their needs and state-of-the-art facilities. We firmly believe that this improved working environment will help to increase the creativity, innovation and satisfaction of our teams.

Serving our customers
This new infrastructure will foster a closeness between our customers and all of YVSS' services, particularly our R&D department. This will enable us to offer innovative solutions that meet our customers' expectations, ensuring their continued satisfaction.

Alongside our distributors and dealers
Centralising the teams within this new building will provide an opportunity to welcome our network of dealers and distributors for training sessions that will be conducted in association with various YVSS departments, such as sales, after-sales service and technical service.
These sessions are designed to enhance their skills, so they can better serve our end customers and optimise the use of our products.

Economic and social impact
In addition to the benefits for our employees, this project also represents a significant investment for the Epernay region. The construction of the building will generate local jobs and stimulate the regional economy. YVSS is proud to be actively involved in the development of our community.

Progress of the work
Construction began in June 2024 with the building's official inauguration scheduled for summer 2025.

About Yanmar Vineyard Solutions
Yanmar Vineyard Solutions, based in Epernay, France, specialises in the development and design of solutions that protect the safety of individuals and preserve vineyard territories and terroirs.
