

YANMAR

Yanmar Corn harvester (Corn Header)

CH3R

Flexible / Capable of fall down harvesting / Low product loss / Save fuel consumption

**High harvesting
performance**

**Capable of moist corn harvesting
Capable of fall down harvesting**

Better product

Plant specimen

Corn

Faster, Better product, Get more job

***Easy to harvest fall down crop
Collect more product from fall down condition***

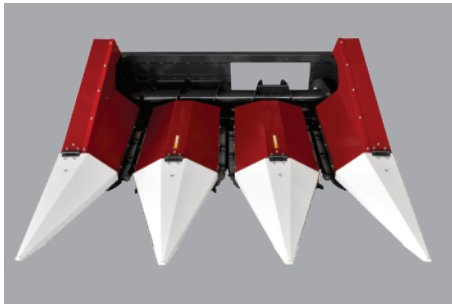

Capable of harvesting 5 rai/hr
Job done quickly
Increase volume of work per day.

Because of Yanmar corn header,
it can harvest fall down crop efficiently.
Moreover, product are clean since
high performance of Yanmar threshing unit.

Light weight / Flexible / Save fuel / Easy maintenance

Total weight 480 kgs

- No need to addition rear weight
Reduce combine harvesting carrying load
Great fuel saving.

Easy maintenance

- Maintenance points are set at outside for easy to check and maintenance
Made from steel for long working period.

Capable of harvesting in all field condition

- Can harvest in many weed field, fall down field, dry field and high moist field besides product loss is small.

Specification data

Model	Type	Working Power (HP)	Average velocity (m/s)	Working efficiency (rai / hr)	Weight (kg)	Dimension (mm)	Corn row distance (mm)	Corn row type (row)	Loss rate (percent)	Humidity (percent)
CH3R	Grain tank / Top Sacker	70-115	1.02 (3.7 กม./ชม.)	5	480	2,250 x 2,225 x 815	600-750	3	<3%	20-30%

* Designing and information can change without notification for product development.

* Working efficiency is up to field condition.
