

For the Manufacturing department, located in Almere, we are looking for a:

MATERIAL PLANNER (m/f)

Objective:

Performs detailed planning, ordering and control activities of parts and products for YEU Operations.

Main responsibilities:

Parts and Products control

- Performs the MRP process and purchases all production and sales parts (C-orders; including emergency orders). Does the purchase ordering, taking account of P/O-lots and delivery times, and controls confirmations. Consults suppliers if necessary. Does the follow-up from ordering till delivery. Gives feedback to the persons involved if necessary.
- Gathers all necessary information needed for the MRP process, and does related proposals (such as lot sizes, packing methods, consumptions).
- Communicates with a supplier in case of wrong deliveries (quantity, documents, timeliness, etc.). Makes agreements with a supplier to come to correct deliveries.
- Organizes and coordinates all needed administrative and physical actions in case of rejections as result of an incoming inspection. Works closely with the Supervisor Incoming Goods and the supplier to have continuity in availability of parts with the requested quality.
- Gathers all information needed for clear suppliers performances and informs suppliers, production management and the procurement specialist periodical and incidental.
- For structural and out of ordinary problems the procurement specialist can be asked for assistance and further communication with the supplier. In this case all information will be handed over to the procurement specialist to solve the problem.
- Consults the planner production about stagnation in the availability of parts.
- Organizes stock counting in consultation with the manager production.
- Assists on request to investigate and solve problems with invoices and related issues.

Requirements

- Education at MBO-level
- Min. 3 year work experience in a similar position, preferably in an international technical (assembly) environment
- Familiar with purchasing planning
- Technical background is an advantage
- Microsoft Office Excel skills (medior), knowledge of Oracle is an advantage
- Able to perform under pressure and to meet deadlines
- Languages: English and Dutch written and spoken

Work base is in Almere, therefore candidates should live within an acceptable distance.

About Yanmar

Yanmar Europe B.V. is a subsidiary of Yanmar Co. Ltd., a Japanese family owned business.

Yanmar, founded in 1912, is producer of diesel engines and components, as well as agricultural machinery, mini-excavators and micro cogeneration units.

The engines are used in a wide range of applications for the agricultural, industrial construction and marine markets, both commercial and pleasure.

Approximately twenty thousand people work for the group worldwide, in Asia, the Americas and Europe.

Yanmar Europe is located in Almere, the Netherlands. Activities here include the sales of diesel engines, agricultural machinery and micro cogeneration units to the EMEA markets, the assembly of marine engines and agricultural machinery and the sales and supply of spare parts.

Yanmar is an international operating and thinking organization where different cultures and nationalities are appreciated. Yanmar is known as a well-established brand and wins golden opinions because of its client orientated and subservient attitude towards its customers.
