

For the Commercial Marine department, located in Almere, the Netherlands, we are looking to recruit an:

APPLICATION ENGINEER (m/f)

The Commercial Marine department is responsible for the international sales and after sales of medium speed and commercial high speed diesel engines with an output of up to approximately 5000 hp. These engines are used in deep sea shipping and short sea shipping as propulsion engines and as marine generator sets.

Summary Position Description

- Responsible for setting up drawings, detailed engineering auxiliary systems and share recommendations with team members and our customers if applicable.
- Responsible for evaluating drawings of your customers on project and case by case basis.
- Provides support in setting up, managing and verifying the technical specifications of projects and for purchasing local equipment for these projects or future solutions.
- Provides Application Engineering, and support based on a perceived need in our department or in need at our customers (ship owners, shipyards, designers, our factory and other manufacturers)
- Provides Application Engineering Warranty service support based on a perceived need in local Sales and Service department.
- Maintains relations with local and foreign suppliers for support activities, inhibiting factors and work relations, for insights into developments in all this area.
- Maintains relations with all relevant government authorities for support activities, inhibiting factors and work relations, for insights into developments in all this area
- Executes the activities by communicating with Yanmar Japan “on daily basis”.
- The character of this position demands competence for travelling and attending meetings with our customers (ship owners, shipyards, designers, our factory or other manufacturers) or inspection work on board worldwide and to develop good relationships with our local distributors / agents.

Requirements

- MBO level, or HBO starter in technical with interest in ship equipment and maritime business (e.g. Engineering or Mechanical engineering or Automotive).
- 2 - 4 year working experience in business to business is recommended.
- Interest or experience marine or in automotive or in road machinery engines sector.
- Affinity or experience electric control systems or willing to develop these skills.
- Interest or experience to work maritime sector.
- Interest to work in international environment.
- Competence: Microsoft Office 365; Autocad (2D, 3D is a plus)
- Good “customer-oriented” communication skills in English in speaking and writing.
- Good competence to find tailored solutions for our customers with our products and network.
- Ability to motivate all related members by good team work and co-operation

Work base is in Almere, therefore candidates should live within an acceptable distance.

About Yanmar

Yanmar Europe B.V. is a subsidiary of Yanmar Co. Ltd., a Japanese family owned business.

Yanmar, founded in 1912, is producer of diesel engines and components, as well as agricultural machinery, mini-excavators and micro cogeneration units.

The engines are used in a wide range of applications for the agricultural, industrial construction and marine markets, both commercial and pleasure.

Approximately twenty thousand people work for the group worldwide, in Asia, the Americas and Europe.

Yanmar Europe is located in Almere, the Netherlands. Activities here include the sales of diesel engines, agricultural machinery and micro cogeneration units to the EMEA markets, the assembly of marine engines and agricultural machinery and the sales and supply of spare parts.

Yanmar is an international operating and thinking organization where different cultures and nationalities are appreciated. Yanmar is known as a well-established brand and wins golden opinions because of its client orientated and subservient attitude towards its customers.
