

For Yanmar Marine International, located in Almere, we are looking for a:

PRODUCT ENGINEER

Due to the rapid business expansion and forward integration YMI is currently looking for a Product Engineer for the Engineering & Development team.

Objective

As a product engineer you will be responsible for the design of marine pleasure craft inboard diesel engine systems. The type of projects could include:

- New product development
- Value Improvement projects
- Quality improvement projects
- Boat tests
- Assembly Support
- Marketing Enhancements

Position Description

- Responsible for marine pleasure craft diesel engine system layout, design and includes 3D modelling.
- Responsible to support OEM boatbuilders, sales and after sales.
- Responsible for understanding and maintaining the whole marine engine solution system layout and impact on other functional areas.
- Responsible to support in providing input to PV&V (Product Verification & Validation) testcases and review results.

In addition, you will:

- Produce and / or evaluate possible design solutions to improve cost, quality and performance of marine engine systems.
- Follow Engineering policies and procedures.
- Maintain models / drawings for engineering changes.
- Compile and structure the required information to document the design solution for building of prototypes and adaptation of the design with involvement of other engineers, supply- and sales management.
- Participates in studies in Engineering organization and technology development in his area.
- Work regularly with colleagues in different Yanmar business units across the world.
- Support engineering specifications which must be fulfilled for end –user information, such as: manual, charts, and product materials.
- Apply knowledge of company products, policies and practices to provide economies through standardization of parts and products.
- Gain and apply knowledge on customer needs, competitive systems, regulations and standards.
- Provide technical support and problem solving expertise to sales, manufacturing and supply management organizations.

Requirements

- Bachelor's degree in Mechanical and/or automotive (or equivalent)
- Interest in/ affinity for marine recreational applications
- Knowledge of CREO Pro engineer or similar 3D modeling software
- Fluent English in speaking and writing
- Ability and willingness to travel internationally
- The ability to work both independently and in an engineering team
- Self-motivator with strong attention to detail

Workbase is in Almere, therefore candidates must live within an acceptable distance and must have a permanent residence- and work permit for the Netherlands.
