FOR IMMEDIATE RELEASE

Yanmar presents latest attachments range at BAUMA 2022

Yanmar Compact Equipment EMEA will present its latest range of machine attachments at this year's BAUMA exhibition. Designed to perfectly match and complement Yanmar's globally acclaimed machines, these new attachments give operators the ability to tackle a multitude of applications with ease and efficiency.

From mechanical and hydraulic quick couplers and powertilts, to a comprehensive line-up of buckets, rippers, forks, sorting grapples, tiltrotators and augers, the new range aims to tackle every jobsite task with ease. Adapted to suit all EMEA markets, the attachments are all fully-compatible with Yanmar's latest models, enabling operators able to switch between tools in seconds.

Setting the standards in quality, durability and performance, each new attachment has been developed in partnership with leading attachment brands. Thanks to the creation of a dedicated new division, customers and dealers will benefit from expert support, access to central stock, fast delivery, unbeatable financing solutions and the option of combining machine and attachment orders in one easy-to-manage centralised process.

Cédric Durand, Director Product Management EMEA at Yanmar Compact Equipment, commented: "With efficiency and flexibility key to jobsite productivity, we've invested heavily in developing a comprehensive range of attachments that can tackle almost every task, optimise the capability of our equipment portfolio and help operators to deliver even more from the comfort of their cab.

"While our latest models are already capable of excelling across numerous applications and a variety of terrains, we wanted to create a supporting range of attachments that could help operators to deliver above and beyond. Working in partnership with customers, dealers and the industry's leading brands, we're proud to offer a comprehensive range that achieves just that.

"With every new attachment fully-compatible with our latest range, there's no need for quick hitch retrofitting or complex aftermarket installation. Thanks to clever design, prioritising speed and simplicity for the operator, it's easy to switch between attachments quickly and safely from within the cab."

YANMAR

Located at Outdoor Space North, booth FN 1017/2, ‘Yanmar City’ will feature four areas dedicated to the company’s road construction, demolition, earthmoving and landscaping equipment, as well as a special zone for its all-electric line-up. Alongside presenting its latest range of attachments, Yanmar will also unveil a number of new models and prototypes, as well as a whole host of product technologies and customer-oriented finance options.

About Yanmar

With beginnings in Osaka, Japan in 1912, Yanmar was the first ever to succeed in making a compact diesel engine of a practical size in 1933. Moving on, with industrial diesel engines as the cornerstone of the enterprise, Yanmar has continued to expand its product range, services, and expertise to deliver total solutions as an industrial equipment manufacturer. As a provider of small and large engines, agricultural machinery and facilities, construction equipment, energy systems, marine, machine tools, and components — Yanmar’s global business operations span seven domains.

On land, at sea, and in the city, Yanmar’s Mission of “providing sustainable solutions focused on the challenges customers face, in food production and harnessing power, thereby enriching people’s lives for all our tomorrows,” stands testament to Yanmar’s determination to provide us with “A Sustainable Future”.
