Yanmar America to Showcase VFR Solutions at GASFA 2022

Yanmar will attend GASFA at table G-25

Adairsville, GA (September 23, 2022) – Yanmar America will participate in the 2022 Fall Conference for the Georgia Association of State Facilities Administrators to be held September 26 – 28 in Augusta, Georgia. The annual event brings together Georgia State facilities managers for intensive workshops, educational sessions, and a trade show. Yanmar America's Energy Systems Regional Sales and Service Manager Eddie Caton will attend the Conference to share information about the company's Variable Refrigerant Flow (VRF) gas heat pump air conditioning systems at table G-25.

Using a natural gas-powered engine to drive dual scroll compressors, Yanmar's VRF Heat Pump can maintain powerful heating performance, even with low outdoor temperatures, by capturing heat off the unit's engine to increase efficiency. Not only do Yanmar's VRF units withstand some of the toughest temperatures Mother Nature can deliver, but they also do it with supreme efficiency. The cost of operating the compressor in our outdoor units is a fraction of the cost of that of a standard electric system, resulting in large savings in electricity costs.

About Yanmar America Corporation
