ABOUT YANMAR

With beginnings in Osaka, Japan, in 1912, YANMAR was the first ever to succeed in making a compact diesel engine of a practical size in 1933. A pioneer in diesel engine technology, YANMAR is a global innovator in a wide range of industrial equipment, from small and large engines, agricultural machinery and facilities, construction equipment, energy systems, marine, to machine tools, and components.

YANMAR's global business operations span seven domains. On land, at sea, and in the city, YANMAR provides advanced solutions to the challenges customers face, towards realizing **A SUSTAINABLE FUTURE**.

YANMAR Vineyard Solutions SAS (YVSS) is based in Epernay, near Reims, in the heart of the Champagne Region. This new BU (since 2019) from YANMAR has introduced a new, technological breakthrough for wine producers – a vineyard robot which offers a host of benefits for narrow wine growing operations including enhanced safety, productivity, cost reductions & versatility.

YV01 is an autonomous spraying robot which can transform the way vineyards operate and is backed by YANMAR's long-established, cost-effective technology & quality. Due to its light weight and compact dimensions, YV01 can climb & descend slopes of up to 45% and won't compress soils in any weather conditions. Furthermore, it is easily transportable and ensures that vines are precisely sprayed with the exact amount of droplets which means less spraying fluids are required.

Products and projects are produced in Japan and are sold via a dealer/ distributor network to the champagne & wine producers.

VACANCY

What are you going to do?

Your ultimate goal is to improve quality by solving complex challenges, related to performance, design, reliability, safety, legal and maintainability expectations. To achieve this, in addition to the list below, you are also involved in setting up, implementing, designing and optimizing the quality management system, defining and analyzing risks in the product and process. You do this by collecting, analyzing, classifying and presenting information. Based on this information, challenges to be addressed are prioritized. Since we are a start-up, it may also happen that you also support other disciplines/tasks. Together we work on future success! The current team consists of 10 colleagues, but will be expanded considerably in the near future. For some matters you work together with colleagues from Japan or other countries for example the regional head office in Almere (YANMAR Europe).

Your main tasks and responsibilities

- In the field of safety, you focus on preventing failures in the products and processes that can lead to accidents. In the event of an incident, you take the right actions;
- To comply with the legal requirement, you ensure compliance with local laws and regulations and implementation (such as CE certification, ISO standard research, and participation in the Auto Robots Committee for QA), collect and develop information about local regulations, handle and manage personal data regulations and other common matters such as management of hazardous materials and management of overseas trade;
- To live up to our brand reputation for quality, you collect quality information on new and existing products, create Instructions for incorporating quality information into development and production teams, review warranty issues and handling complaints and/or disputes;
- You also ensure that other matters that may be part of the quality assurance, such as packaging and shipping.

PROFILE

Who are we looking for?

As a QA Specialist you communicate excellently. You are visible in all departments and communicate with different people - from employees to management. As a QA Specialist you are a point of contact within the organization and you provide advice at various levels. You work in an organized manner, preferably supported by project management methods. You work according to the principle: 'Practice what you preach!' Since we are a start-up, you know how to find the perfect balance between innovation/entrepreneurship and compliance with important quality rules and legislation.

The ideal candidate

- Minimum Bachelor level;
- Successful working experience in Quality Assurance and/or Manufacturing Control, preferably in an international environment;
- Strong organisational skills, excellent communication skills at different levels, likes to work in an international environment and the willingness to quickly obtain specific business knowledge;
- The following mindset qualities apply to you: Analytical, you have an eye for detail, creative mind, problem-solving attitude, enthusiastic, pro-active and eager to learn;
- Strong language skills, fluent in both spoken and written French and English. Preferably as second language Japanese.

Work location

Your regular workplace is our office in Epernay, near Reims, in France.

OFFER

What do we offer?

In this position as Quality Assurance Specialist you are an indispensable link in the further expansion of our organization and you contribute to sustainability within the vineyard business. We offer a position in a truly international organization, with respect for each individual's culture and room for individual development. A job in a dynamic environment, where every day is different. Freedom to take initiatives and express ideas. Motivated and open colleagues that will be pleased to welcome you. YANMAR is a stable and solid employer.

Employee Benefits

- ✓ A competitive salary matching your knowledge and experience;
- ✓ The possibility to follow training and education;
- ✓ 25 vacation days (+the ability to build up time for time);
- ✓ Good pension scheme and collective health insurance.

Purpose

In this journey we work together as a team to serve the purpose of improving the sustainability and efficiency of winery operations. We help to reduce the amount of chemicals needed and minimize human exposure. An environment in which we develop new skills and expertise with the aim of environmentally friendly and socially responsible practices in the agriculture industry.

BONNE ANNÉE 2023

NEXT STEPS

“The great thing about working in a start-up is the continuous innovation. As a team you have a plan with an objective that you are working towards. In the case of YANMAR Vineyard Solutions, we are working on a beautiful product that fits into a sustainable future. Within YANMAR we have five research areas, this product fits within all 5 domains. It also goes without saying that this fits perfectly in the future of YANMAR. How cool is it to step into this phase and deliver real added value!.”
