Yanmar to Invest R\$ 280 Million in New Factory in Brazil

Yanmar will build a new factory in Indaiatuba, São Paulo state, Brazil.

São Paulo, Brazil (August 18, 2025) — Yanmar has announced plans to build a new factory in Indaiatuba, São Paulo state, Brazil, with an investment of R\$ 280 million. The project, set for phased completion by 2030, will expand production capacity, integrate operations, and enhance processes to meet rising demand.

The 140,000 square meter facility — three times the size of Yanmar's current local factories — will initially add capacity to produce 7,000 tractors per year, up from 5,000, and is expected to create about 100 direct and indirect jobs by 2029. The first 36,000 square meter phase is scheduled to begin operations in 2027.

Automated assembly lines, improved logistics, and advanced safety and ergonomics systems will modernize operations, while sustainability features such as natural lighting, photovoltaic energy, and automated lighting control will align with Yanmar's global environmental goals.

"This new factory is essential for meeting market demand and advancing our growth in Brazil," said Wagner Santaniello, Innovation and Marketing Manager at Yanmar South America. "We aim to increase our tractor market share from 10% to 12% while maintaining leadership in mini excavators

and expanding in other segments.”

The project will consolidate manufacturing with administrative, commercial, and executive offices for greater operational synergy. It will also implement the Yanmar Production System, based on proven manufacturing excellence from Japan. Yanmar has been active in Brazil for more than 65 years and employs over 300 people at its Indaiatuba site.

About Yanmar

With beginnings in Osaka, Japan, in 1912, Yanmar was the first ever to succeed in making a compact diesel engine of a practical size in 1933. A pioneer in diesel engine technology, Yanmar is a global innovator in a wide range of industrial equipment, from small and large engines, agricultural machinery and facilities, construction equipment, energy systems, marine, to machine tools, and components — Yanmar’s global business operations span seven domains. On land, at sea, and in the city, Yanmar provides advanced solutions to the challenges customers face, towards realizing A Sustainable Future.
