Yanmar Power Solutions Co., Ltd. Begins Operations

Yanmar Power Solutions Co., Ltd.

Osaka, Japan (October 1, 2025) – Yanmar Holdings Co., Ltd. is pleased to announce the start of operations for Yanmar Power Solutions Co., Ltd., a new company formed through the spin-off of the large power products business from Yanmar Power Technology Co., Ltd. This new company will focus on both marine and land-use large engines.

The marine industry is committed to developing and implementing decarbonization-related technologies to achieve carbon neutrality by 2050. At Yanmar Power Solutions, the company will leverage its expertise in engine development to advance multi-fuel technology that accommodates various fuels, including hydrogen and methanol.

Background and Purpose of the Company Split: Announced on October 18, 2024

Formerly a business unit of Yanmar Co., Ltd. until April 2020, Yanmar Power Technology Co., Ltd., has focused on the development, manufacturing, and sales of engines, particularly marine engines, industrial engines, and standby power systems. This spin-off aims to enable more agile operations and faster decision-making by aligning each company's activities with its specific business goals and market needs. Yanmar Power Solutions will focus on large marine propulsion and auxiliary engines as well as engines for land-use power generation applications while Yanmar Power Technology will focus on industrial engine production, sales and service.

About Yanmar

With beginnings in Osaka, Japan, in 1912, Yanmar was the first ever to succeed in making a compact diesel engine of a practical size in 1933. A pioneer in diesel engine technology, Yanmar is a global innovator in a wide range of industrial equipment, from small and large engines, agricultural machinery and facilities, construction equipment, energy systems, marine, to machine tools and components — Yanmar's global business operations span seven domains. Guided by its Brand Statement, "*A Sustainable Future – New Value Through Technology –*," Yanmar provides advanced solutions to the challenges customers face on land, at sea, and in the city, working towards realizing a sustainable future.
