## Takashi Nogami Appointed as President and Representative Director of Yanmar Power Technology

Takashi Nogami Appointed as President of Yanmar Power Technology

Osaka, Japan (March 2, 2026) - Yanmar Power Technology Co., Ltd., a subsidiary of Yanmar Holdings, is pleased to announce the appointment of Takashi Nogami as President and Representative Director, effective April 1, 2026. Nogami, who joined Yanmar in 1996, previously served as Divisional Manager of the Procurement Division, showcasing exceptional leadership and strategic insight.

A graduate of Osaka University, Nogami brings over two decades of industry experience to his new role. He is committed to enhancing Yanmar Power Technology's dedication to delivering innovative power solutions and aims to strengthen the company's market position while promoting collaboration and sustainability.

This appointment comes on the heels of a significant transformation that Yanmar Power Technology undertook in September 2025, when the company split into two distinct entities: Yanmar Power

Technology Co., Ltd., dedicated to industrial engines, and Yanmar Power Solutions Co., Ltd., which focuses on marine and industrial power systems, including medium- and high-speed engines and standby power solutions. This reorganization is designed to enable more agile operations and faster decision-making, aligning each division's activities with specific decarbonization goals and market needs.

“I am honored to take on this new role,” said Nogami. “I look forward to working with our talented team to develop solutions that meet our customers' evolving needs and contribute to a sustainable future.”

Nogami's appointment signifies a key advancement for Yanmar Power Technology as it continues to provide reliable and efficient power solutions globally.

### **About Yanmar**

With beginnings in Osaka, Japan, in 1912, Yanmar was the first ever to succeed in making a compact diesel engine of a practical size in 1933. A pioneer in diesel engine technology, Yanmar is a global innovator in a wide range of industrial equipment, from small and large engines, agricultural machinery and facilities, construction equipment, energy systems, marine, to machine tools, and components — Yanmar's global business operations span seven domains. On land, at sea, and in the city, Yanmar provides advanced solutions to the challenges customers face, towards realizing A Sustainable Future.
