

Newly designed special curvy-shaped stem

The longer waterline translates to a smoother ride, superior course tracking, and confident handling in rough seas, rivaling much larger boats.

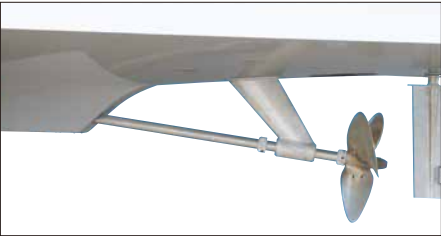

New Flare Shape

The innovative flare shape offers more deck space while minimizing spray for enhanced comfort.

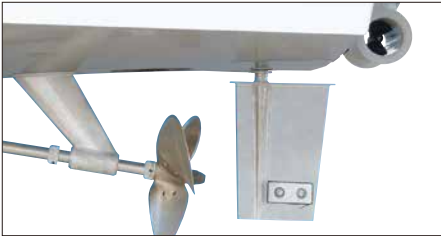

Reduced chine overhang to improve planing efficiency

A generous entry angle at the bow cuts through waves more smoothly.

Uniaxial inboard direct drive system

Achieves stable running with a well-balanced center of gravity.

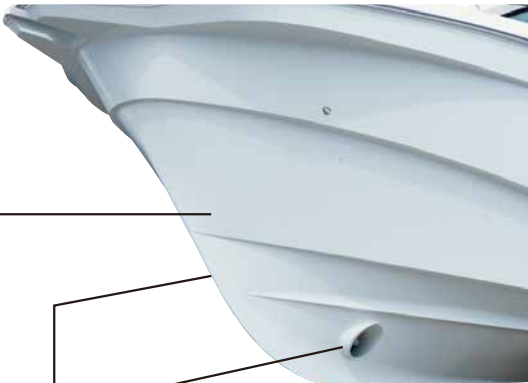

New transom shape

Suppresses hump during acceleration and ensures good visibility.

Electric trim tab

The running posture can be adjusted optimally.

Bow thruster(Factory Option)

Improved docking and low-speed maneuvering

Large-sized fin keel

Big Opening on fin keel to counteract the forces of wind and waves
